

NEW LOW CARBON TRUCK PROGRAMME TRIAL

DP WORLD

SEVEN STEPS TO JOINING THE LOW CARBON TRUCK PROGRAMME

STEP 1

Sign up to DP World's Low Carbon Truck Programme

www.dpworld.com/london-gateway/low-carbon-truck-programme

STEP 2

Send a list of your company owned trucks to DP World to be monitored during the qualification period

STEP 3

Continue making VBS bookings at London Gateway and Southampton during the qualification period

STEP 4

DP World will calculate how many trucks qualified and how much HVO you are eligible to receive for the current price of diesel

STEP 5

Book your place at our Carbon Literacy Training

STEP 6

Use your HVO allocation from your chosen fuel supplier during the 3-month delivery window

STEP 7

Report your scope 1 carbon emission savings!

Launched in September 2025, our new Low Carbon Truck Programme Trial provides UK HGV fleet owners an opportunity to trial Hydrotreated Vegetable Oil (HVO), a cleaner, renewable diesel alternative.

Under the scheme, fleet owners can claim up to 5,000 litre of HVO for the price of diesel for every vehicle that moves through London Gateway or Southampton port over 50 times within each three-month qualifying period using the Vehicle Booking System (VBS).

WHY ARE WE ENCOURAGING THE USE OF HVO?

HVO is currently gaining traction as a more sustainable alternative to fossil diesel and offers a viable step change towards net-zero. Offering many benefits that include ease of transition and OEM approval, as well as up to a 90% CO_2e emissions reduction the business case for trialling HVO is compelling.

BECOME CARBON LITERATE

Participating companies will also be invited to attend a free eight hour Carbon Literacy training workshop that has been created for the logistics industry.
