

UPGRADE TO SEAMLESS CONSUMER ELECTRONIC LOGISTICS WITH DP WORLD

Bringing your tech products to market and managing your returns, refurbishment and recycling.

With consumers increasingly demanding faster delivery amid greater supply chain complexity, world-class logistics are critical for configuration, fulfilment and repair of today's consumer technology products. Armed with 30 years' experience serving the technology sector and powered by our global network across over 75 countries, we are a world-class partner for your logistic requirements. We have 61 TAPA-A compliant sites for consumer electronics worldwide, servicing five of the seven largest global tech companies. We create scalable custom solutions to bring your consumer tech products to market quickly and reliably.

THE FUTURE OF FULFILMENT: LEADING PC MANUFACTURER

To increase the volume of products shipped and configured for a top PC manufacturer worldwide, we:

- Took over customer and supplier-owned inventory and built specialised fulfilment centres for their B2B, eCommerce, and retail lines to streamline each product's journey.
- Integrated three levels of customisation, ranging from localisation to laser etching and tagging, and up to software preload and office configuration.
- Managed transportation solutions for parcel shipping, retail, and customer service as well as returns and repairs management.

Our complete supply chain solution now handles over 400,000 desktops and laptops being configured each year. We also handle shipment of over 60,000 units on peak days from a single facility, and complete over 100,000 'drop in a box' localisations each year.

SMARTER, QUALITY SOLUTIONS

We used cutting-edge, in-house IT systems to continuously improve how we work, helping us move over 250 million products for our customers every year. Every order we manage is processed with precision and care. Plus, with TAPA-A compliant facilities, your products experience top-level security at every step.

SERVICES INCLUDE:

- 61 sites around the world for Consumer Electronics
- Advanced Control Tower visibility
- Manufacturing and Assembly services
- Reverse Repair and Service Parts
